Cashier: methods, amounts, fees and timelines / Registration and payment methods from official material for an international audience

Operator description — English block Read More on the main page, with a focus on India. The operator describes Open Account → entering a mobile number → verification with a one-time code via SMS → creating an account and setting up a login with a password. Full name, email and address may be requested as the profile is filled out or during payment activity. Direct login via the registration page is also indicated. The block describes the procedure for getting started, while the general terms contain the full form.

Method	Operation and operator approval scope
Bank transfer IMPS/NEFT	Transfers from a personal bank account, highlighted for India. Indian withdrawal via Paymentz IMPS appears separately in the EUR configuration.
MiFinity	E-wallet, support for INR and other currencies.
Jeton Wallet	Deposit and withdrawal.

Method	Operation and operator approval scope
Neteller	E-wallet for online payments.
Skrill	Deposit.
Paysafecard	Deposit with a prepaid voucher.
AstroPay	Virtual prepaid method. In the cashier responses EUR from this session is absent.
Bitcoin, Ethereum, other coins	The operator declares crypto deposits via Finrax and NodaPay. The cashier provides a wallet address or QR, crediting after the required network confirmation. The processing list EUR in this session names CoinsPaid.

Read More states that most deposits go through immediately, especially e-wallets and local methods, and the provider may apply a fee or conversion. Availability depends on the market, account status and the chosen route. The block also states SSL for the account and transactions and certified provider systems, including RNG where it applies.

Cashier: methods, amounts, fees and timelines / How a deposit is made

Field	Value and scope
